## Step 1: Assemble Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame by securing CB9-S to the F34s and F36s and lock extrusions together. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only half a turn. Slide the IB2 into the extrusion to connect sides. Tighten to the proper tension to lock extrusions together.

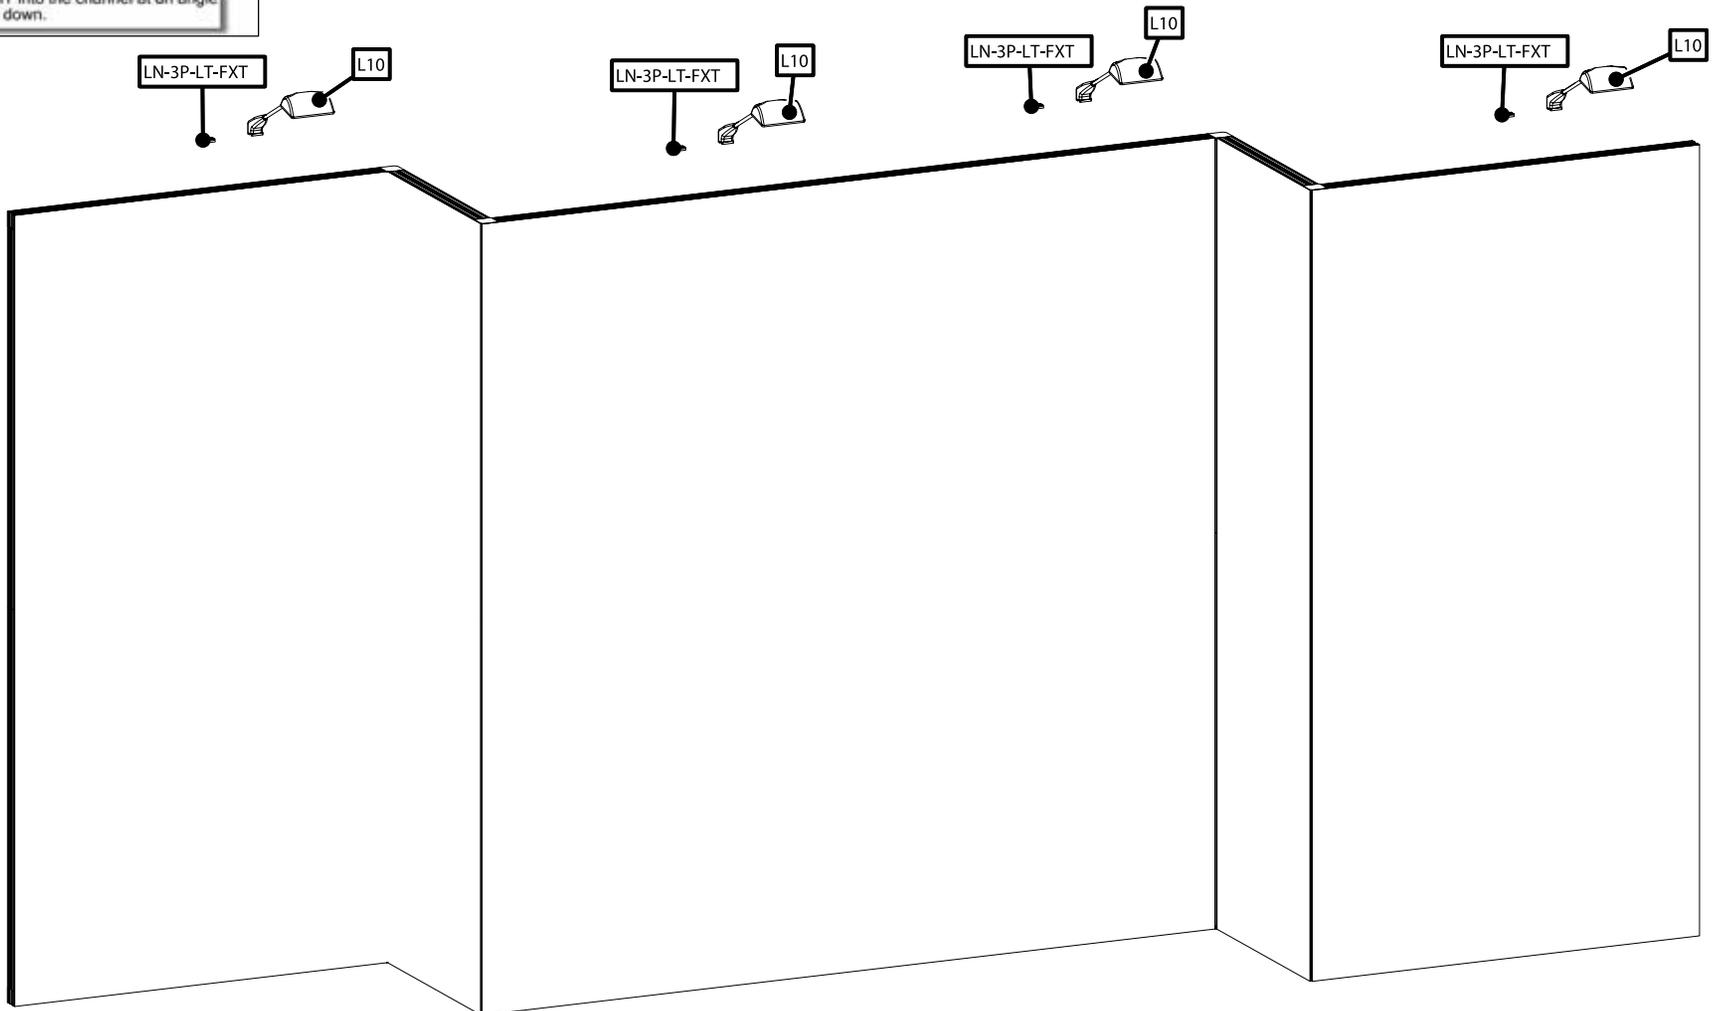

## Step 2: Apply Graphics

Install graphic(s) by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner, go across the top and then down the sides to the bottom. Assure each graphic is tightly inserted. When taking graphics off, take care to gently pull by attached pull tab.

### Step 3: Attach Lights

Slide light clip onto each light. Then slide light into the extrusion channel at an angle and gently lower down and repeat for each light.

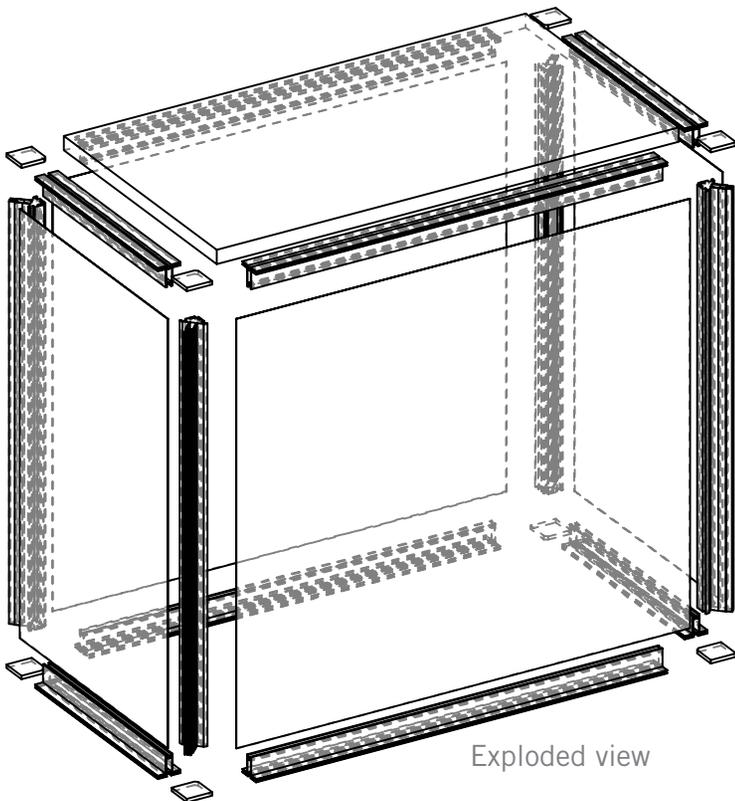

**Parts Included:**

## Step 1: Assemble Counter Frame

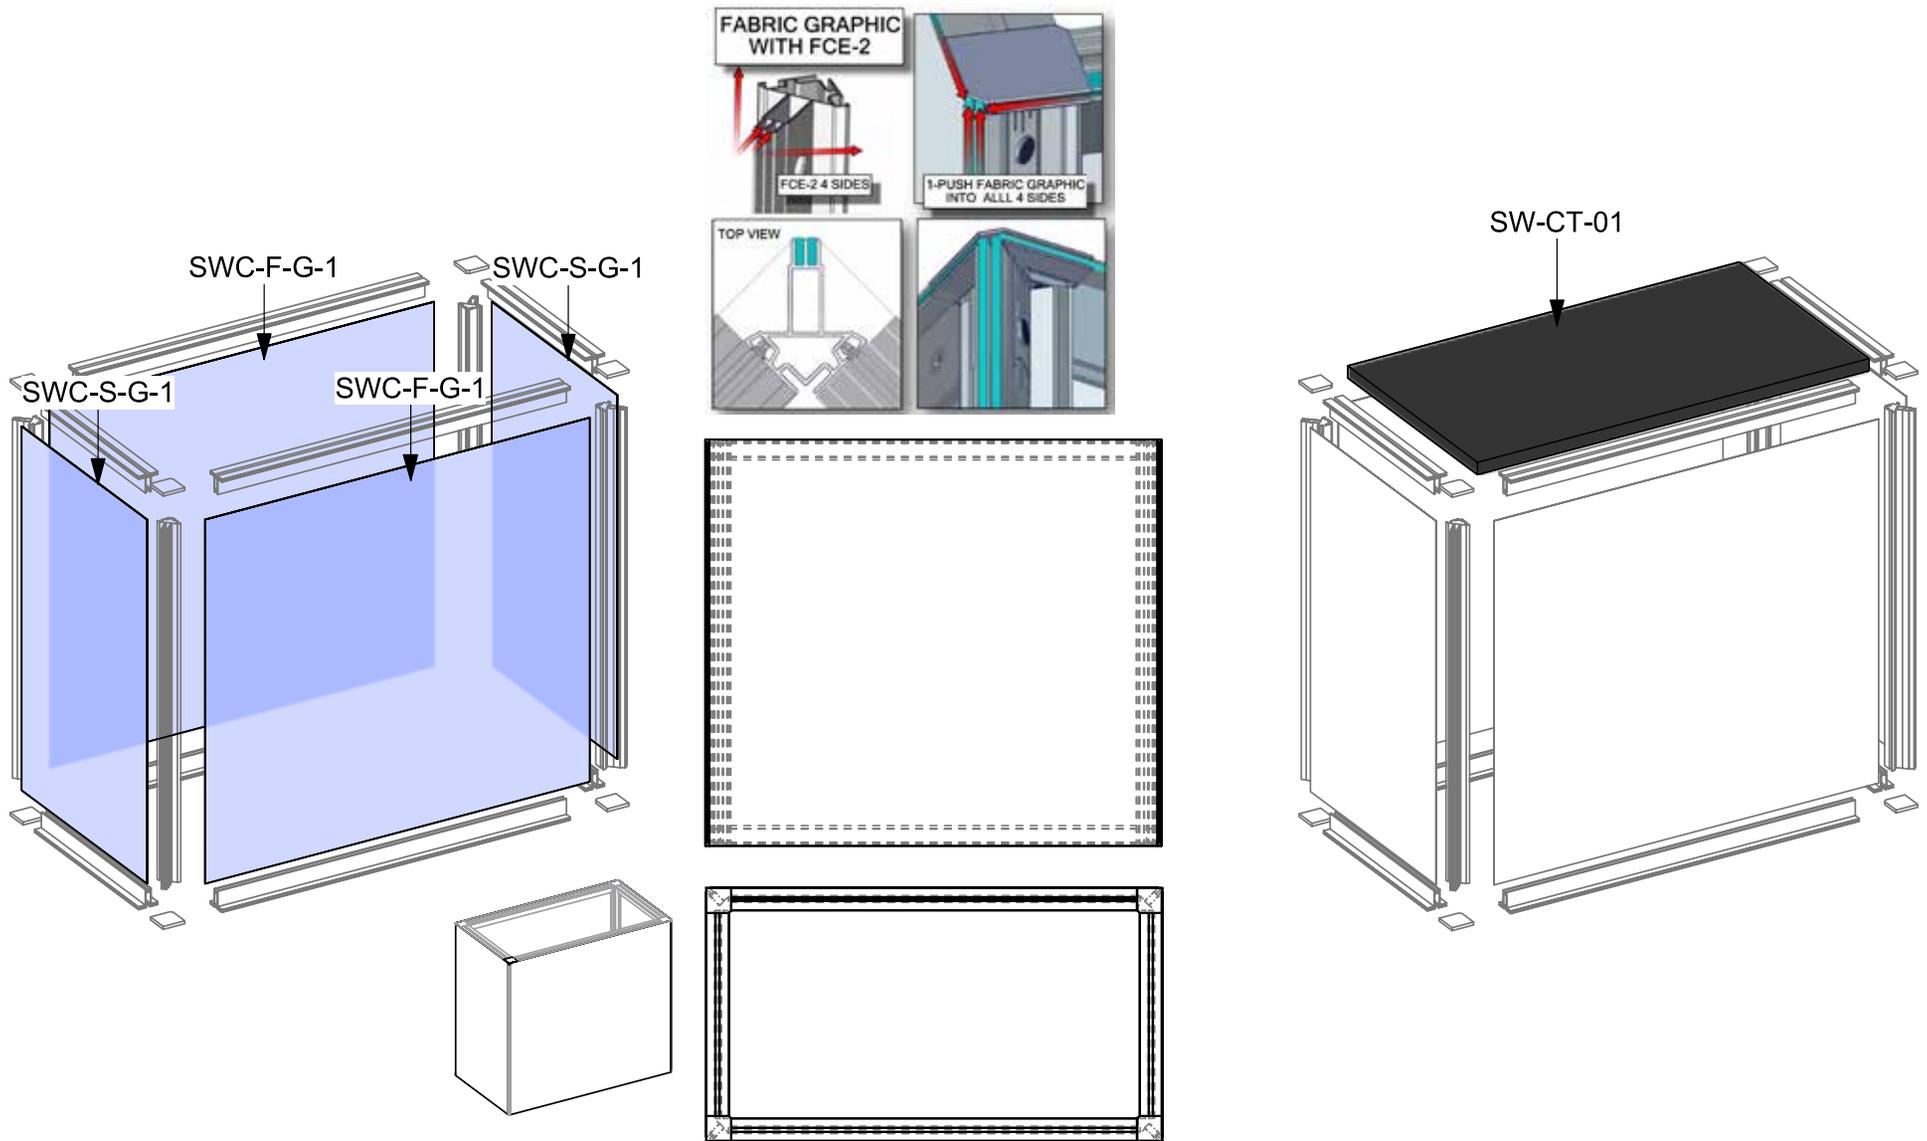

Arrange pieces on the floor as shown in the diagram below. Assemble frame by locking F37 and F41 to the F57s. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only a quarter turn, so as to not strip the locks by over tightening.

**WARNING!**  
Locks should **ONLY**  
be turned a quarter turn, so  
as not to **STRIP** the locks by  
over torquing them

## Step 2: Apply Graphics & Attach Countertop

Apply push-fit fabric graphic(s) by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner, go across the top and then down the sides to the bottom. Repeat for each side. Assure each graphic is tightly inserted. When taking graphics off, take care to gently pull by attached pull tab. Next, gently place the countertop onto the completed frame.
